

Twin Rivers Wireless Internet Service

The Twin Rivers Owners Association provides free wireless internet service throughout the complex. The name of the network, or SSID, is TwinRivers2. No password is required to connect to the network, but upon connecting to the network, and before being allowed to access the Internet, clients will initially be directed to a splash page.

To gain access to the Internet, a user must click on the button marked "Continue to the Internet" on the splash page. The splash page looks similar to the following.
